

## DAILY ONLINE ACTIVITIES SUMMARY

<b>Date:</b>	09-06-2020	<b>Name:</b>	Anvitha Poojary
<b>Sem &amp; Sec</b>	6A	<b>USN:</b>	4AL17CS008
<b>Online Test Summary</b>			
<b>Subject</b>	CGV AND CNSC		
<b>Max. Marks</b>	CGV :30 CNSC:60	<b>Score</b>	CGV:17 CNSC:42
<b>Certification Course Summary</b>			
<b>Course</b>	Machine Learning with Python		
<b>Certificate Provider</b>	COGNITIVE CLASS .ai	<b>Duration</b>	12hr
<b>Coding Challenges</b>			
<b>Problem Statement:</b> 1. Write a Java Program to remove all white spaces from a string without using replace() 2. Python Program to count even and odd numbers			
<b>Status: completed</b>			
<b>Uploaded the report in Github</b>		Yes	
<b>If yes Repository name</b>		<a href="https://github.com/anvithapo99/Daily-Report">https://github.com/anvithapo99/Daily-Report</a>	
<b>Uploaded the report in slack</b>		Yes	

**Online test details:**

## Subject: CGV

**CGV TEST** Total points 17/30 ?

Mention your E-Mail Address, Name and USN without fail, otherwise your form will be rejected.  
Choose the correct answer. Don't choose multiple answers.  
Each question carries ONE mark and Maximum duration is 30 minutes.  
Submission of more than one form is not allowed.  
Submit the form before 10.00 AM, otherwise it will be rejected.

## Certification course details:

### Machine Learning with Python

Today I have studied following topics:

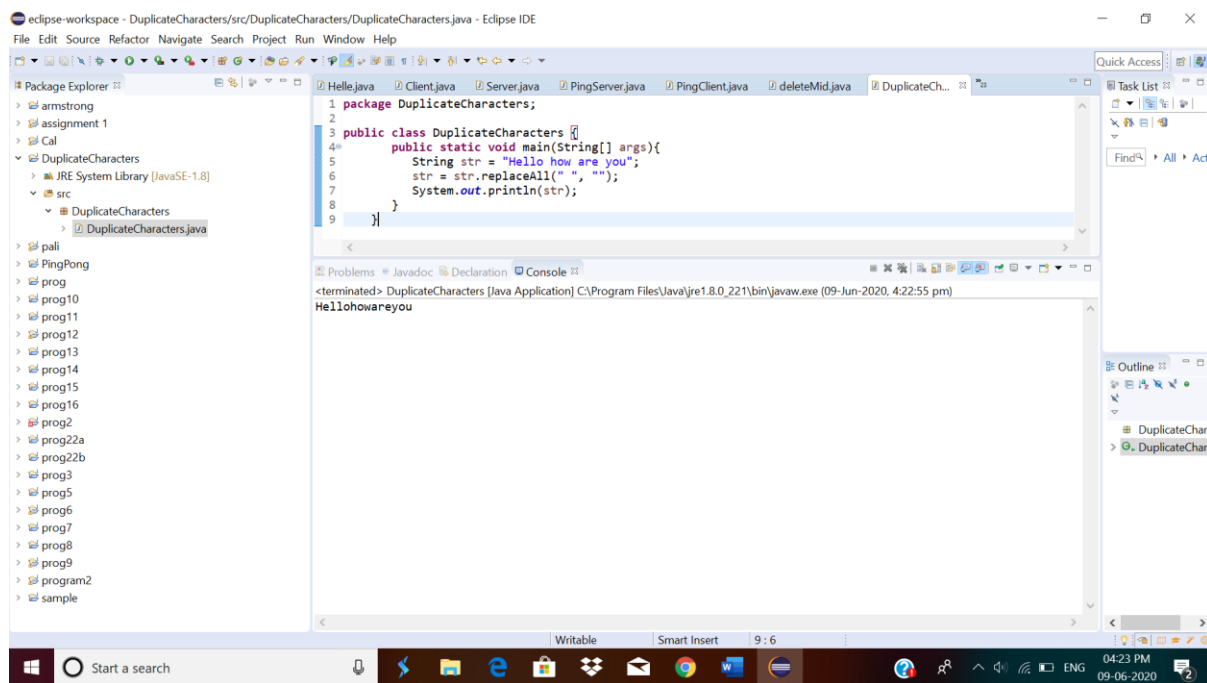

- Logistic regression
- Linear regression
- Training of logistic regression module
- What is support regression vector machine
- What is clustering
- Clustering application

## Coding Challenges Details:

1. Write a Java Program to remove all white spaces from a string without using replace()

```
package DuplicateCharacters;  
  
public class DuplicateCharacters {  
    public static void main(String[] args){  
        String str = "Hello how are you";  
        str = str.replaceAll(" ", "");  
        System.out.println(str);  
    }  
}
```

2. Python Program to count even and odd numbers

```
NumList = []
```

```
Even_count = 0
```

```
Odd_count = 0
```

```
Number = int(input("Please enter the Total Number of List Elements: "))
```

```
for i in range(1, Number + 1):
```

```
    value = int(input("Please enter the Value of %d Element : " %i))
```

```
    NumList.append(value)
```

```
for j in range(Number):
```

```
    if(NumList[j] % 2 == 0):
```

```
        Even_count = Even_count + 1
```

```
    else:
```

```
        Odd_count = Odd_count + 1
```

```
print("\nTotal Number of Even Numbers in this List = ", Even_count)
```

```
print("Total Number of Odd Numbers in this List = ", Odd_count)
```

**output:**
